

KLOVE is a great resource in our community by providing positive music and a positive message in an area that needs their message. It allows me as a parent to offer my children music and a message that is wholesome not perverted as other secular radio stations are in this day and age. Our lives are filled with destructive movies, language, violence and music on our radio stations. KLOVE is different and hopefully will be around for a long time to counter act the other influence that radio, movies and video games are doing to our children's minds and behavioral development. If KLOVE is removed or replaced it will be a tragic loss to the community. KLOVE provides hope and resources for love and acceptance. It helps give people hope who are depressed or losing sight of their value in this world. No secular radio station, video store or music retailer can make such a claim. KLOVE is saving lives and giving people hope in a world that is drowning in what the FCC allows to be presented in other medias. If you are going to allow the corruption of our young people's minds, you should also do the responsible thing and offer an alternative that is positive and gives humanity hope rather than the despair that is already being sent out over the air waves. Please do not allow KLOVE to be removed from the airwaves. My family would be dramatically changed if you do.
